## Abstracts

The global Medical Silicone Rubber Self-Adhesive Tape market size is expected to reach \$ 446 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

In 2024, global sales of Medical Silicone Rubber Self-Adhesive Tape reached approximately 170 million meters, with an average market price of about USD 1.82 per meter, an annual production capacity of roughly 250 million meters, and an industry-average gross margin of approximately 34%.

Medical Silicone Rubber Self-Adhesive Tape is a soft, skin-friendly tape using medical-grade silicone adhesive on a backing layer. It is designed for fixation of dressings, catheters or tubes to the skin, for skin protection around wounds, or for scar management ? particularly for post-operative scars, burns, or other healed skin injuries. The key properties include good biocompatibility, hypoallergenic adhesive, comfortable and flexible wear, reliable adhesion yet painless removal without adhesive residue, and suitability for repeated or prolonged wear on intact skin.

Upstream suppliers for Medical Silicone Rubber Self-Adhesive Tape typically provide medical-grade silicone adhesives (e.g. PDMS-based adhesives, pressure-sensitive adhesive resins), backing substrates (non-woven fabric, polyurethane film, or other backings), manufacturing and slitting/packaging equipment, as well as packing materials and labels. These raw materials come from chemical/materials manufacturers and medical-consumable suppliers. Downstream, tapes are consumed by hospitals, clinics, burn units, dermatology and plastic-surgery centers, long-term care and wound-care facilities, as well as by individual patients/consumers for post-operative care or scar management. Because the tape is often single-use or used for a limited period, consumption volume depends heavily on surgery rates, wound-care frequency, dressing-change cycles, and duration of scar-management protocols. With global increases in surgical procedures and growing demand for scar prevention and better cosmetic

outcomes, consumption downstream is rising steadily.
