The global Medical Toothbrush market size is expected to reach \$ 494 million by 2032, rising at a market growth of 6.6% CAGR during the forecast period (2026-2032).

In 2025, global production of medical toothbrushes reached 840 million units, with an estimated average selling price of US\$0.37 per brush. Medical toothbrushes are professional toothbrush products designed for hospitals, dental clinics, post-operative rehabilitation, ICUs, long-term care, elderly care, bedridden patients, patients with fragile oral mucosa undergoing radiotherapy and chemotherapy, and other special oral care groups. Their core features include low-invasive cleaning, convenient care, infection control, post-operative protection, suction and drainage, or single-use hygiene. The upstream mainly includes PP/PE/ABS handle materials, nylon/PBT/ultra-fine brush bristles, medical sponges, suction tube connectors, toothpaste/oral cleaning solutions, chlorhexidine or other oral care solutions, sterile or hygienic packaging materials, paper-plastic bags, bristle implantation equipment, injection molding equipment, and sterilization/clean packaging services; the midstream includes toothbrush injection molding, bristle implantation, bristle rounding, suction interface assembly, cleaning solution packaging, individual packaging, sterilization or clean packaging, medical consumable registration, and OEM/ODM production; the downstream mainly serves hospitals, ICUs, dental hospitals, dental clinics, nursing homes, rehabilitation centers, home care, medical device distributors, and pharmacies. Gross profit margin is approximately 25%-45%.

Future industry trends include: hospitals and long-term care facilities promoting standardized oral care procedures, with increased penetration of suction toothbrushes and care kits among ICU, bedridden, and dysphagia patients; dental implants, oral surgery, chemotherapy and radiotherapy, and the aging population driving growth in

ultra-soft bristles, minimally invasive, and post-operative care toothbrushes; product forms upgrading from single toothbrushes to integrated care systems that combine toothbrush, suction, cleaning solution, moisturizing, and process recording; and in terms of channels, hospital procurement and medical distributors place greater emphasis on compliance, stable supply, and clinical process compatibility, while dental professional channels prioritize brand, doctor recommendations, and patient comfort.
