Abstracts

Medical transcription, also known as MT, is an allied health profession dealing with the process of transcribing voice-recorded medical reports that are dictated by physicians, nurses and other healthcare practitioners. Medical reports can be voice files, notes taken during a lecture, or other spoken material. These are dictated over the phone or uploaded digitally via the Internet or through smart phone apps.

Medical transcription (MT) is an allied health profession, which deals in the process of transcription, or converting voice-recorded reports as dictated by physicians or other healthcare professionals, into text format. Medical transcription services provide the groundwork for the adoption of electronic medical records (EMR) system. Medical transcription services allow hospitals and providers to outsource a critical business process, reduce costs, and improve the quality of medical documentation, without additional capital investment. The global medical transcription services market is primarily driven by adoption of medical documentation and recording systems, government's initiatives in health information infrastructure, implementation of EHRs, technological innovations through the use of electronic technology to reduce turnaround time, increasing focus on lowering costs and increasing productivity and improving the quality of patient care while ensuring patient's safety.

SCOPE OF THE REPORT:
