Medical Vehicle Oxygen Concentrator is a colorless, odorless and tasteless gas with a molecular formula of O₂. High-purity oxygen is used for chemical vapor deposition of silicon dioxide; as an oxidation source and as a reactant to produce high-purity water; dry oxidation; mixed with carbon tetrafluoride for plasma etching. Oxygen's primary use stems from its life-sustaining and combustion-supporting properties; it is widely used in the metallurgical industry. It can also be used for water treatment. All oxidation reactions and combustion processes require oxygen, such as the removal of impurities such as sulfur and phosphorus during steelmaking. The temperature of the oxygen and acetylene mixture when burning is as high as 3500 °C, which is used for welding and cutting of steel. Glass manufacturing, cement production, mineral roasting, and hydrocarbon processing all require oxygen. Liquid oxygen is also used as rocket fuel, which is cheaper than other fuels.
