According to our (Global Info Research) latest study, the global Medicinal Mushroom Extracts market size was valued at US\$ 474 million in 2024 and is forecast to a readjusted size of USD 745 million by 2031 with a CAGR of 6.7% during review period.

The medicinal mushroom extracts market is driven by the rising demand for natural and plant-based supplements, as consumers increasingly seek holistic approaches to health and wellness. Medicinal mushrooms, such as reishi, lion's mane, and cordyceps, are known for their potential health benefits, including immune system support, anti-inflammatory properties, and cognitive enhancement. Growing awareness of the role of functional foods in preventing chronic diseases has also contributed to the popularity of mushroom extracts. Additionally, the expansion of the wellness industry and the inclusion of medicinal mushrooms in various products like supplements, teas, and cosmetics further boost market growth.

A significant challenge in the medicinal mushroom extracts market is the lack of standardized regulations and scientific validation of health claims. While many consumers are drawn to the perceived benefits, there is limited large-scale clinical research to conclusively support the efficacy of certain mushroom extracts. This can lead to skepticism among more cautious consumers and health professionals. Additionally, sourcing high-quality, organic mushrooms and ensuring consistent extraction processes can be costly, impacting the pricing and availability of these products. Variability in potency and quality across different brands can also pose a challenge in gaining consumer trust and regulatory approval.

Medicinal mushrooms have long been recognized for their health benefits in Eastern

medicine; traditional medicine has used mushrooms for thousands of years. Studies have found that these medicinal mushrooms contain a variety of components that act as antioxidants, support immune function, and even promote cellular health and function.

Global medicinal mushroom extracts key players include Verygrass, Amino Up Chemical, Nammex etc. Global top 5 manufacturers hold a share about 10%. Asia Pacific is the largest market, with a share about 63%, followed by Europe and North America, both have a share about 30 percent.
