Medium bore three piece pneumatic actuator ball valve (DN 100-300) is a heavy-duty automatic fluid control valve designed for main process lines and critical branch pipelines in industrial facilities. Driven by compressed air, it delivers reliable on/off and flow regulation for large-capacity media. It features a robust three-piece bolted body, high structural rigidity, low flow resistance, bi-directional tight sealing, stable operation under high pressure, and easy on-site disassembly and maintenance. It meets the requirements of long-term continuous operation in demanding process systems across industries.

The price of DN 100-300 three piece pneumatic actuator ball valve varies by material, pressure rating, actuator configuration and purchase volume. The unit price of mainstream industrial models ranges from 3,000 to 12,000 US dollars per unit, with high-spec or premium imported versions reaching 15,000 USD/unit. Bulk orders typically qualify for a discount of 10% to 25%. The industrial chain is well-established. The upstream covers metal raw materials, sealing elements, fasteners and pneumatic components. The midstream undertakes precision machining, assembly and performance testing. The downstream connects manufacturers, engineering contractors and operating enterprises in petroleum, chemical, power, water treatment, heating and other fields, forming a complete industrial chain from raw material supply to end application.
