According to our (Global Info Research) latest study, the global Medium and Small TFT-LCD market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

The industry chain of small and medium-sized TFT-LCD panels covers multiple links, including liquid crystal manufacturing, circuit board manufacturing, and module manufacturing. Among them, liquid crystal manufacturing is the core link of the entire industrial chain, and it is also an important factor determining the quality and cost of TFT-LCD panels. In the entire industrial chain, the technical strength and scale advantages of liquid crystal manufacturing enterprises play a key role in market share and industry status.

Small and medium-sized TFT-LCD panels are suitable for display devices in electronic products, so they are closely related to the market demand for electronic products. With the acceleration of the trend of intelligence and portability, the demand for electronic products such as smart phones, tablet computers, and smart watches continues to grow, which also drives the market demand for small and medium-sized TFT-LCD panels.

The competition in the small and medium-sized TFT-LCD panel industry is fierce, and the technology, quality and cost competition among enterprises is significant. In terms of technology, liquid crystal display technology is the key. In terms of quality, enterprises must ensure product stability and economy. In terms of cost, the establishment of large-scale production is the core means to maintain costs and improve competitiveness. At the same time, with the development of OLEDAMOLED technology, these new

technologies will also compete with TFT-LCD technology, and companies need to upgrade and transform their technology in a timely manner.
