Abstracts

According to our (Global Info Research) latest study, the global Medium-sized Electric Excavator market size was valued at US\$ 1048 million in 2025 and is forecast to a readjusted size of US\$ 3505 million by 2032 with a CAGR of 19.0% during review period.

In 2025, global production of medium-sized electric excavators reached 9,430 units, with an estimated average selling price of \$108,000 per unit. Medium-sized electric excavators are defined as pure electric hydraulic excavators?typically weighing between 6 and 20 tonnes?that rely solely on power batteries, electric drive systems, and electro-hydraulic actuators for power. They utilize electric motors to drive the main hydraulic pumps for operations such as traveling, slewing, and the movement of the boom, arm, and bucket. These machines are suitable for applications in building construction, municipal engineering, industrial parks, ports, auxiliary mining operations, and logistics hubs. The upstream supply chain includes high-strength steel, structural components, crawler undercarriages, hydraulic pumps and valves, hydraulic motors, slewing reducers, battery cells, battery packs, BMS, electric drive motors, inverters, VCUs, high-voltage wiring harnesses, thermal management systems, and intelligent control modules. The midstream sector involves the manufacturing of the complete machines. Downstream customers include construction firms, mining companies, port operators, equipment rental companies, municipal agencies, and large industrial enterprises. Gross profit margins range from approximately 20% to 35%.
