The medium wire cutting machine tool is a high-precision CNC machine tool that is widely used in mold manufacturing, precision machining, aerospace, automobile manufacturing and other industries. It uses thin copper wire or copper-plated wire to cut the workpiece through the principle of electro-erosion, and can realize the processing of complex shapes, micro holes and high-precision parts. Its working principle is to apply high voltage current between the electrode wire and the workpiece, and use the current to pass through the conductive liquid medium to cause electro-erosion reaction between the electrode wire and the workpiece, thereby gradually removing the material on the surface of the workpiece.

This report is a detailed and comprehensive analysis for global Medium Wire Cutting Machine Tool market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application.
