The global Melamine Rapid Test Strips market size is expected to reach \$ 272 million by 2032, rising at a market growth of 6.9% CAGR during the forecast period (2026-2032).

Melamine Rapid Test Strips are a type of testing reagent used for rapid detection of melamine content in samples. Melamine is an organic compound that is often added by criminals to food and feed to increase nitrogen content, creating the illusion of high protein content. However, it poses a serious threat to the human body and can cause diseases such as urinary system stones. This test strip is based on a specific detection principle and can easily and quickly perform qualitative or semi quantitative detection of melamine in samples.

This report studies the global Melamine Rapid Test Strips production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Melamine Rapid Test Strips and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
