The global Melatonin Receptor Agonists market size is expected to reach \$ 452.6 million by 2029, rising at a market growth of 9.6% CAGR during the forecast period (2023-2029).

The market for melatonin receptor agonists has witnessed growth in recent years due to the increasing recognition of the importance of sleep health and the rising prevalence of sleep disorders worldwide. Factors contributing to the market growth include lifestyle changes, stress-related sleep disturbances, shift work, and the growing elderly population, as sleep disorders tend to be more common in older adults.

Melatonin receptor agonists, also known as melatonin agonists or melatonergic drugs, are a class of medications that bind and activate melatonin receptors in the brain. These receptors play a crucial role in regulating the sleep-wake cycle and circadian rhythms.
