ID: GB7D1AD4B72EEN

Abstracts

According to our (Global Info Research) latest study, the global Memory Chips Yield Analysis Service market size was valued at US\$ 541 million in 2025 and is forecast to a readjusted size of US\$ 1231 million by 2032 with a CAGR of 11.8% during review period.

Memory Chips Yield Analysis Service comprises specialised software, analytics platforms, implementation support, managed engineering services and project-based diagnostics used to improve the proportion of conforming memory dies and packages during product development and volume production. The market covers DRAM, NAND Flash, NOR Flash, SRAM, HBM and emerging non-volatile memory devices, and connects design diagnostics, wafer-fabrication records, defect inspection, metrology, wafer probe, wafer maps, packaging, burn-in, reliability and final-test data. Core functions include data cleansing and traceability, statistical process control, correlation analysis, spatial-pattern recognition, anomaly detection, root-cause analysis, design of experiments, predictive modelling and closed-loop process or test optimisation. Delivery can take the form of standard software licences or subscriptions, software with implementation and integration, managed yield-analysis services, project-based engineering diagnosis, or platforms bundled with test, edge-computing or manufacturing equipment. The principal users are memory IDMs, foundries, fabless semiconductor companies, outsourced assembly and test providers, equipment suppliers and product-engineering organisations seeking to accelerate yield ramp, contain production excursions, reduce test and scrap costs, strengthen reliability screening and improve cross-supply-chain traceability.

Key Findings

AI and high-performance computing is the largest application cluster in the analyst model

Software with implementation and integration remains the principal delivery model

Cross-stage lifecycle analysis is gaining importance as memory production complexity increases

East Asia is the primary demand centre while North America and Europe lead much of the software supply

Market Trends

The market is moving from isolated wafer-map or test-report analysis towards connected lifecycle platforms that combine design, fabrication, probe, packaging, reliability and final-test data. HBM stacking, advanced DRAM nodes and high-layer-count 3D NAND are increasing the value of cross-process traceability because a yield loss may originate several steps before it becomes visible. Customers are also demanding faster feedback, with tester-edge analytics and equipment-integrated modules complementing central data platforms. Machine learning is increasingly used for anomaly detection, spatial-pattern recognition and predictive risk scoring, but engineering explainability and actionability remain more important than model complexity alone. Hybrid cloud and on-premise deployments are becoming common because customers want centralised model development while retaining sensitive production data within the factory. Commercially, the market is shifting towards recurring licences, subscriptions and managed services, although implementation, data integration and process-engineering support remain essential to successful deployment.

Market Dynamics

Drivers

Demand is supported by rapid investment in HBM, advanced DRAM and 3D NAND

capacity, the higher cost of defective dies in advanced packages, and stricter reliability expectations across AI infrastructure, data centres, automotive electronics and industrial systems. Increasing process steps, greater test-data volumes and more fragmented supply chains make manual analysis slower and less effective. Memory manufacturers are therefore investing in systems that shorten yield ramp, identify excursions earlier, optimise test limits and link wafer-level conditions with package and final-test outcomes. Localisation of semiconductor production also creates new requirements for standardised data infrastructure and engineering workflows across newly built fabs and assembly facilities.

Restraints

Adoption is constrained by fragmented data formats, legacy equipment interfaces, inconsistent naming conventions and limited availability of clean historical datasets. Many projects require substantial integration work before analytical models can produce reliable conclusions. Customers may also be reluctant to place sensitive process and test data in external cloud environments, increasing deployment cost and implementation time. Yield improvement is difficult to attribute to a single software system because process changes, equipment maintenance and product-mix shifts occur simultaneously. Long validation cycles, shortage of experienced yield engineers and the need to customise models for individual memory architectures can delay purchasing decisions and restrict the scalability of standard products.

Opportunities

The strongest opportunities lie in HBM yield optimisation, known-good-die screening, cross-die stack traceability, advanced packaging analytics and joint analysis of wafer, package and reliability data. Managed analytics services can address shortages of specialist engineers among smaller memory suppliers, fabless companies and outsourced test providers. Open data models and reusable connectors can reduce deployment time across heterogeneous factories, while edge inference can enable dynamic test limits and immediate containment without exporting raw production data. Domestic semiconductor investment in China, the United States, Europe, Japan and Southeast Asia also creates opportunities for local implementation, data-sovereignty solutions and multilingual engineering support. Providers that build memory-specific templates and measurable proof-of-value programmes can expand from individual lines to enterprise-wide platforms.

Challenges

The principal challenge is converting statistical correlation into a physically credible and operationally executable root cause. False alerts can reduce engineer confidence, while missed excursions may carry significant scrap and reliability consequences. Model drift is a persistent risk because product revisions, equipment maintenance, process-node transitions and test-program changes continuously alter data distributions. Vendors must also support a wide range of equipment, database and file formats without compromising performance or security. Competitive pressure from internal engineering tools and broader semiconductor manufacturing platforms may limit pricing power. Sustainable growth therefore depends on domain expertise, rapid integration, transparent model governance and demonstrated improvement in yield, cycle time, test cost or quality risk.

Value Chain Analysis

The upstream value chain consists of EDA data, manufacturing-equipment logs, inspection and metrology results, automated-test-equipment data, data storage, computing infrastructure and semiconductor communication standards. Value is created when these heterogeneous data sources are cleansed, mapped to common product and process identifiers, linked across wafer and package genealogy, and converted into actionable engineering signals. The midstream market includes yield-management software, analytics engines, tester-edge platforms, implementation consulting, data integration, managed monitoring and project-based diagnostics. Downstream customers apply the output to product introduction, production control, test optimisation, reliability screening, supplier management and customer-quality response. Software vendors generally benefit from recurring and high-margin revenue, but implementation partners and engineering-service providers capture meaningful value where data environments are fragmented. Equipment-integrated suppliers can strengthen customer retention through direct access to high-quality process or test data, while independent software providers compete through cross-vendor openness and enterprise-wide scalability.

Segment Insights

By application, the analyst model allocates approximately 26% of demand to AI and high-performance computing systems and 19% to general data centres and cloud

infrastructure. Mobile smart devices represent around 15%, personal computers and client computing around 13%, and automotive electronics around 9%. Communications infrastructure, industrial edge computing and the Internet of Things each account for approximately 6%, while consumer electronics and safety-critical applications form smaller but specialised segments. AI and data-centre applications lead because HBM and high-performance memory carry high die values, complex package dependencies and demanding qualification requirements.

By service structure, software with implementation and integration is the largest delivery model because customers typically require connectors, data normalisation, user configuration and engineering workflow design before deployment. Cross-stage lifecycle analysis and wafer-fabrication-stage analysis are the most commercially important service stages, while new-product yield ramp, excursion monitoring and root-cause analysis are the principal service objectives. Managed services are expanding as customers seek continuous monitoring and specialist support without maintaining large internal analytics teams.

Downstream Market Opportunities

AI accelerators and high-performance computing create the clearest near-term opportunity through HBM stack yield, known-good-die selection, thermal and reliability correlation, and advanced-package traceability. Cloud and enterprise data centres require long-term stability across server DRAM and solid-state storage, creating demand for reliability trend analysis and fleet feedback. Automotive and industrial users provide a smaller but attractive opportunity because qualification, traceability and extended product lifecycles increase the value of systematic yield and quality analysis. Mobile and client computing remain volume-driven markets where the commercial case depends on reducing test time, avoiding over-screening and improving performance binning at scale.

Regional Insights

East Asia is the largest demand region because it contains the principal memory-wafer, packaging and test clusters. South Korea, China, Taiwan and Japan generate demand across HBM, DRAM, NAND, mature memory and outsourced testing, although customer requirements differ in cloud policy, local support and equipment compatibility. North America remains influential in analytics software, EDA, test platforms and AI

infrastructure demand, while Europe contributes industrial software, automotive quality requirements and specialist engineering capabilities. Southeast Asia is an important growth area for assembly, packaging and testing, creating opportunities for traceability, cross-site standardisation and managed engineering services.

Regional localisation policies are encouraging new fabs and advanced-packaging facilities outside established clusters, but software adoption normally follows equipment installation and production qualification with a time lag. Suppliers with local engineering teams, multilingual interfaces and flexible on-premise or hybrid deployment models are better placed to capture these projects. China offers particular opportunity for domestically supported platforms, while Japan and Europe favour solutions that integrate with existing equipment ecosystems and rigorous quality-management practices.

Competitive Landscape Analysis

Competition is distributed among independent yield-management software vendors, EDA and test-platform companies, inspection and metrology suppliers, manufacturing-equipment groups and specialised engineering-service firms. Independent platforms compete through cross-vendor data integration and enterprise scalability, while equipment and test suppliers differentiate through direct access to high-frequency, high-quality data and tighter closed-loop control. EDA providers link silicon diagnosis with design correction, and specialist service firms compete through rapid customisation and domain expertise. Purchasing decisions depend on installed equipment, data-security requirements, memory-technology coverage, implementation resources, interoperability and the ability to demonstrate measurable operational value. The market is therefore fragmented by workflow and customer environment rather than controlled by a single product category.

Report Scope

This report is a detailed and comprehensive analysis for global Memory Chips Yield Analysis Service market. Both quantitative and qualitative analyses are presented by company, by region & country, by Service Stage and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market

share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Memory Chips Yield Analysis Service market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Memory Chips Yield Analysis Service market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Memory Chips Yield Analysis Service market size and forecasts, by Service Stage and by Application, in consumption value (\$ Million), 2021-2032

Global Memory Chips Yield Analysis Service market shares of main players, in revenue (\$ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Memory Chips Yield Analysis Service

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Memory Chips Yield Analysis Service market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include PDF Solutions, Inc., KLA Corporation, Onto Innovation Inc., Synopsys, Inc., Siemens AG, Advantest Corporation, Teradyne, Inc., Keysight Technologies, Inc., Applied Materials, Inc., Dassault Systèmes SE, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Memory Chips Yield Analysis Service market is split by Service Stage and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for Consumption Value by Service Stage and by Application. This analysis can help you expand your business by targeting qualified niche markets.

Market segmentation

Market segment by Service Stage

Design Stage Yield Analysis

Wafer Fabrication Stage Yield Analysis

Wafer Probe And CP Test Stage Analysis

Packaging And Assembly Stage Yield Analysis

Final Test And Reliability Stage Analysis

Cross-Stage Lifecycle Yield Analysis

Other

Market segment by Delivery Model

Standard Software License Or Subscription

Software With Implementation And Integration

Managed Yield Analysis Service

Project-Based Engineering Diagnosis

Platform With Hardware Or Equipment Bundle

Other

Market segment by Service Objective

New Product Yield Ramp

Production Excursion Monitoring And Containment

Root Cause Analysis And Engineering Debug

Test Cost And Limit Optimization

Quality And Reliability Risk Screening

Supply Chain Traceability And Collaboration

Factory Efficiency And Closed-Loop Control

Other

Market segment by Application

AI And High-Performance Computing Systems

General Data Centers And Cloud Infrastructure

Personal Computers And Client Computing

Consumer Electronics

Automotive Electronics

Communications And Network Infrastructure

Industrial Edge Computing And Internet Of Things

Other

Market segment by players, this report covers

PDF Solutions, Inc.

KLA Corporation

Onto Innovation Inc.

Synopsys, Inc.

Siemens AG

Advantest Corporation

Teradyne, Inc.

Keysight Technologies, Inc.

Applied Materials, Inc.

Dassault Systèmes SE

proteanTecs Ltd.

yieldHUB Ltd.

yieldWerx Inc.

Galaxy Semiconductor, Inc.

DR YIELD Software & Solutions GmbH

eInnoSys Technologies LLP

Semitronix Corporation

Shanghai UniVista Industrial Software Group Co., Ltd.

Primarius Technologies Co., Ltd.

FA Software (Shanghai) Co., Ltd.

Hitachi, Ltd.

Market segment by regions, regional analysis covers

North America (United States, Canada and Mexico)

Europe (Germany, France, UK, Russia, Italy and Rest of Europe)

Asia-Pacific (China, Japan, South Korea, India, Southeast Asia and Rest of Asia-Pacific)

South America (Brazil, Rest of South America)

Middle East & Africa (Turkey, Saudi Arabia, UAE, Rest of Middle East & Africa)

Chapter Outline

Chapter 1, to describe Memory Chips Yield Analysis Service product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top players of Memory Chips Yield Analysis Service, with revenue, gross margin, and global market share of Memory Chips Yield Analysis Service from 2021 to 2026.

Chapter 3, the Memory Chips Yield Analysis Service competitive situation, revenue, and global market share of top players are analyzed emphatically by landscape contrast.

Chapter 4 and 5, to segment the market size by Service Stage and by Application, with consumption value and growth rate by Service Stage, by Application, from 2021 to 2032.

Chapter 6, 7, 8, 9, and 10, to break the market size data at the country level, with revenue and market share for key countries in the world, from 2021 to 2026. and Memory Chips Yield Analysis Service market forecast, by regions, by Service Stage and by Application, with consumption value, from 2027 to 2032.

Chapter 11, market dynamics, drivers, restraints, trends, Porters Five Forces analysis.

Chapter 12, the key raw materials and key suppliers, and industry chain of Memory Chips Yield Analysis Service.

Chapter 13, to describe Memory Chips Yield Analysis Service research findings and conclusion.

Contents

1 MARKET OVERVIEW

1.1 Product Overview and Scope

1.2 Market Estimation Caveats and Base Year

1.3 Classification of Memory Chips Yield Analysis Service by Service Stage

1.3.1 Overview: Global Memory Chips Yield Analysis Service Market Size by Service Stage: 2021 Versus 2025 Versus 2032

1.3.2 Global Memory Chips Yield Analysis Service Consumption Value Market Share by Service Stage in 2025

1.3.3 Design Stage Yield Analysis

1.3.4 Wafer Fabrication Stage Yield Analysis

1.3.5 Wafer Probe And CP Test Stage Analysis

1.3.6 Packaging And Assembly Stage Yield Analysis

1.3.7 Final Test And Reliability Stage Analysis

1.3.8 Cross-Stage Lifecycle Yield Analysis

1.3.9 Other

1.4 Classification of Memory Chips Yield Analysis Service by Delivery Model

1.4.1 Overview: Global Memory Chips Yield Analysis Service Market Size by Delivery Model: 2021 Versus 2025 Versus 2032

1.4.2 Global Memory Chips Yield Analysis Service Consumption Value Market Share by Delivery Model in 2025

1.4.3 Standard Software License Or Subscription

1.4.4 Software With Implementation And Integration

1.4.5 Managed Yield Analysis Service

1.4.6 Project-Based Engineering Diagnosis

1.4.7 Platform With Hardware Or Equipment Bundle

1.4.8 Other

1.5 Classification of Memory Chips Yield Analysis Service by Service Objective

1.5.1 Overview: Global Memory Chips Yield Analysis Service Market Size by Service Objective: 2021 Versus 2025 Versus 2032

1.5.2 Global Memory Chips Yield Analysis Service Consumption Value Market Share by Service Objective in 2025

1.5.3 New Product Yield Ramp

1.5.4 Production Excursion Monitoring And Containment

1.5.5 Root Cause Analysis And Engineering Debug

1.5.6 Test Cost And Limit Optimization

1.5.7 Quality And Reliability Risk Screening

- 1.5.8 Supply Chain Traceability And Collaboration
- 1.5.9 Factory Efficiency And Closed-Loop Control
- 1.5.10 Other
- 1.6 Global Memory Chips Yield Analysis Service Market by Application
 - 1.6.1 Overview: Global Memory Chips Yield Analysis Service Market Size by Application: 2021 Versus 2025 Versus 2032
 - 1.6.2 AI And High-Performance Computing Systems
 - 1.6.3 General Data Centers And Cloud Infrastructure
 - 1.6.4 Personal Computers And Client Computing
 - 1.6.5 Consumer Electronics
 - 1.6.6 Automotive Electronics
 - 1.6.7 Communications And Network Infrastructure
 - 1.6.8 Industrial Edge Computing And Internet Of Things
 - 1.6.9 Other
- 1.7 Global Memory Chips Yield Analysis Service Market Size & Forecast
- 1.8 Global Memory Chips Yield Analysis Service Market Size and Forecast by Region
 - 1.8.1 Global Memory Chips Yield Analysis Service Market Size by Region: 2021 VS 2025 VS 2032
 - 1.8.2 Global Memory Chips Yield Analysis Service Market Size by Region, (2021-2032)
 - 1.8.3 North America Memory Chips Yield Analysis Service Market Size and Prospect (2021-2032)
 - 1.8.4 Europe Memory Chips Yield Analysis Service Market Size and Prospect (2021-2032)
 - 1.8.5 Asia-Pacific Memory Chips Yield Analysis Service Market Size and Prospect (2021-2032)
 - 1.8.6 South America Memory Chips Yield Analysis Service Market Size and Prospect (2021-2032)
 - 1.8.7 Middle East & Africa Memory Chips Yield Analysis Service Market Size and Prospect (2021-2032)

3 MARKET COMPETITION, BY PLAYERS

3.1 Global Memory Chips Yield Analysis Service Revenue and Share by Players (2021-2026)

3.2 Market Share Analysis (2025)

3.2.1 Market Share of Memory Chips Yield Analysis Service by Company Revenue

3.2.2 Top 3 Memory Chips Yield Analysis Service Players Market Share in 2025

3.2.3 Top 6 Memory Chips Yield Analysis Service Players Market Share in 2025

3.3 Memory Chips Yield Analysis Service Market: Overall Company Footprint Analysis

3.3.1 Memory Chips Yield Analysis Service Market: Region Footprint

3.3.2 Memory Chips Yield Analysis Service Market: Company Product Type Footprint

3.3.3 Memory Chips Yield Analysis Service Market: Company Product Application

Footprint

3.4 New Market Entrants and Barriers to Market Entry

3.5 Mergers, Acquisition, Agreements, and Collaborations

4 MARKET SIZE SEGMENT BY SERVICE STAGE

4.1 Global Memory Chips Yield Analysis Service Consumption Value and Market Share by Service Stage (2021-2026)

4.2 Global Memory Chips Yield Analysis Service Market Forecast by Service Stage (2027-2032)

5 MARKET SIZE SEGMENT BY APPLICATION

5.1 Global Memory Chips Yield Analysis Service Consumption Value Market Share by Application (2021-2026)

5.2 Global Memory Chips Yield Analysis Service Market Forecast by Application (2027-2032)

6 NORTH AMERICA

6.1 North America Memory Chips Yield Analysis Service Consumption Value by Service Stage (2021-2032)

6.2 North America Memory Chips Yield Analysis Service Market Size by Application (2021-2032)

6.3 North America Memory Chips Yield Analysis Service Market Size by Country

6.3.1 North America Memory Chips Yield Analysis Service Consumption Value by Country (2021-2032)

6.3.2 United States Memory Chips Yield Analysis Service Market Size and Forecast (2021-2032)

6.3.3 Canada Memory Chips Yield Analysis Service Market Size and Forecast
(2021-2032)

6.3.4 Mexico Memory Chips Yield Analysis Service Market Size and Forecast
(2021-2032)

7 EUROPE

7.1 Europe Memory Chips Yield Analysis Service Consumption Value by Service Stage
(2021-2032)

7.2 Europe Memory Chips Yield Analysis Service Consumption Value by Application
(2021-2032)

7.3 Europe Memory Chips Yield Analysis Service Market Size by Country

7.3.1 Europe Memory Chips Yield Analysis Service Consumption Value by Country
(2021-2032)

7.3.2 Germany Memory Chips Yield Analysis Service Market Size and Forecast
(2021-2032)

7.3.3 France Memory Chips Yield Analysis Service Market Size and Forecast
(2021-2032)

7.3.4 United Kingdom Memory Chips Yield Analysis Service Market Size and Forecast
(2021-2032)

7.3.5 Russia Memory Chips Yield Analysis Service Market Size and Forecast
(2021-2032)

7.3.6 Italy Memory Chips Yield Analysis Service Market Size and Forecast
(2021-2032)

8 ASIA-PACIFIC

8.1 Asia-Pacific Memory Chips Yield Analysis Service Consumption Value by Service Stage (2021-2032)

8.2 Asia-Pacific Memory Chips Yield Analysis Service Consumption Value by Application (2021-2032)

8.3 Asia-Pacific Memory Chips Yield Analysis Service Market Size by Region

8.3.1 Asia-Pacific Memory Chips Yield Analysis Service Consumption Value by Region
(2021-2032)

8.3.2 China Memory Chips Yield Analysis Service Market Size and Forecast
(2021-2032)

8.3.3 Japan Memory Chips Yield Analysis Service Market Size and Forecast
(2021-2032)

8.3.4 South Korea Memory Chips Yield Analysis Service Market Size and Forecast

(2021-2032)

8.3.5 India Memory Chips Yield Analysis Service Market Size and Forecast

(2021-2032)

8.3.6 Southeast Asia Memory Chips Yield Analysis Service Market Size and Forecast

(2021-2032)

8.3.7 Australia Memory Chips Yield Analysis Service Market Size and Forecast

(2021-2032)

9 SOUTH AMERICA

9.1 South America Memory Chips Yield Analysis Service Consumption Value by Service Stage (2021-2032)

9.2 South America Memory Chips Yield Analysis Service Consumption Value by Application (2021-2032)

9.3 South America Memory Chips Yield Analysis Service Market Size by Country

9.3.1 South America Memory Chips Yield Analysis Service Consumption Value by Country (2021-2032)

9.3.2 Brazil Memory Chips Yield Analysis Service Market Size and Forecast (2021-2032)

9.3.3 Argentina Memory Chips Yield Analysis Service Market Size and Forecast (2021-2032)

10 MIDDLE EAST & AFRICA

10.1 Middle East & Africa Memory Chips Yield Analysis Service Consumption Value by Service Stage (2021-2032)

10.2 Middle East & Africa Memory Chips Yield Analysis Service Consumption Value by Application (2021-2032)

10.3 Middle East & Africa Memory Chips Yield Analysis Service Market Size by Country

10.3.1 Middle East & Africa Memory Chips Yield Analysis Service Consumption Value by Country (2021-2032)

10.3.2 Turkey Memory Chips Yield Analysis Service Market Size and Forecast (2021-2032)

10.3.3 Saudi Arabia Memory Chips Yield Analysis Service Market Size and Forecast (2021-2032)

10.3.4 UAE Memory Chips Yield Analysis Service Market Size and Forecast (2021-2032)

11 MARKET DYNAMICS

- 11.1 Memory Chips Yield Analysis Service Market Drivers
- 11.2 Memory Chips Yield Analysis Service Market Restraints
- 11.3 Memory Chips Yield Analysis Service Trends Analysis
- 11.4 Porters Five Forces Analysis
 - 11.4.1 Threat of New Entrants
 - 11.4.2 Bargaining Power of Suppliers
 - 11.4.3 Bargaining Power of Buyers
 - 11.4.4 Threat of Substitutes
 - 11.4.5 Competitive Rivalry

12 INDUSTRY CHAIN ANALYSIS

- 12.1 Memory Chips Yield Analysis Service Industry Chain
- 12.2 Memory Chips Yield Analysis Service Upstream Analysis
- 12.3 Memory Chips Yield Analysis Service Midstream Analysis
- 12.4 Memory Chips Yield Analysis Service Downstream Analysis

13 RESEARCH FINDINGS AND CONCLUSION

14 APPENDIX

- 14.1 Methodology
- 14.2 Research Process and Data Source
- 14.3 Disclaimer

I would like to order

Product name: Global Memory Chips Yield Analysis Service Market 2026 by Company, Regions, Type and Application, Forecast to 2032

Product link: <https://marketpublishers.com/r/GB7D1AD4B72EEN.html>

Price: US\$ 3,480.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/GB7D1AD4B72EEN.html>
