## Abstracts

The global Men No-Show Socks market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Men's no-show socks, also known as invisible socks or low-cut socks, are a type of sock designed to be worn with shoes that expose the top part of the foot, such as loafers, boat shoes, sneakers, or dress shoes. These socks are shorter in length compared to traditional socks and are typically cut below the ankle, allowing them to remain hidden when worn with shoes. No-show socks provide the comfort and moisture-wicking benefits of socks without being visible above the shoe line, giving the appearance of bare feet while still providing protection and cushioning. They come in a variety of materials, colors, and designs to suit different preferences and styles.
