According to our (Global Info Research) latest study, the global Meta-aramid market size was valued at USD 1062.9 million in 2023 and is forecast to a readjusted size of USD 1304.3 million by 2030 with a CAGR of 3.0% during review period.

Aramid Fiber is man-made high-performance fiber, with molecules that are characterized by relatively rigid polymer chains. These molecules are linked by strong hydrogen bonds that transfer mechanical stress very efficiently, making it possible to use chains of relatively low molecular weight. Aramid fibers are a class of heat-resistant and strong synthetic fibers. They are used in aerospace and military applications, for ballistic-rated body armor fabric and ballistic composites, in bicycle tires, and as an asbestos substitute. The name is a portmanteau of 'aromatic polyamide'. They are fibers in which the chain molecules are highly oriented along the fiber axis, so the strength of the chemical bond can be exploited.

The Aramid industry consumption distribution is mainly focused on USA with 30%, Europe with 33% and China with 17%.

Dupont and Teijin are the main manufacturers of Aramid, they hold about 70% of the market share.
