According to our (Global Info Research) latest study, the global Metal 3D Printer market size was valued at USD 1771 million in 2023 and is forecast to a readjusted size of USD 9530.8 million by 2030 with a CAGR of 27.2% during review period.

Metal 3D printer, also called metal additive manufacturing, can produce metallic products through three - dimensional and printing technology. Now it is widely used in automotive industry, aerospace industry and medical industry. Metal 3D printer works by laying down metal powder. A high powered laser then melts that powder in certain precise locations based on a CAD file. Once one layer is melted, the printer will place another layer of metal powder on top, and the process repeats until an entire object is fabricated.

At present, the manufactures of metal 3D printer are concentrated in Europe, USA and China. Europe is the largest production area in the world, which occupied about 90%, followed by USA and China. In the world wide, the top five manufacturers of metal 3D printer are EOS GmbH, GE Additive, SLM Solutions, Renishaw and DMG Mori. And the production of EOS GmbH occupied about 33%.
