Abstracts

According to our (Global Info Research) latest study, the global Metal 3D Printing market size was valued at USD 1256.3 million in 2023 and is forecast to a readjusted size of USD 2079.5 million by 2030 with a CAGR of 7.5% during review period.

Metal 3D printer, also called metal additive manufacturing, can produce metallic products through three - dimensional and printing technology. Now it is widely used in automotive industry, aerospace industry and medical industry. Metal 3D printer works by laying down metal powder. A high powered laser then melts that powder in certain precise locations based on a CAD file. Once one layer is melted, the printer will place another layer of metal powder on top, and the process repeats until an entire object is fabricated.

Europe is the largest 3D Printing of Metals market with about 96% market share. USA is follower, accounting for about 2% market share.

The key players are EOS GmbH, GE Additive, SLM Solutions, 3D Systems, Trumpf, Renishaw, DMG Mori, Sisma, Xact Metal, BeAM Machines, Wuhan Huake 3D, Farsoon Technologies, Bright Laser Technologies etc. Top 3 companies occupied about 71% market share.
