According to our (Global Info Research) latest study, the global Metal Affinity Resin market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Metal Affinity Resin is a material used for protein purification based on the specific binding between metal ions and proteins with specific tags (such as His tags). Commonly used metal ions include nickel (Ni^{2}?), cobalt (Co^{2}?), copper (Cu^{2}?), etc. These ions bind to the resin and can capture target proteins with metal affinity tags. Metal affinity resins are widely used in the purification, analysis and preparation of recombinant proteins.
