Abstracts

The global Metal Biliary Stent market size is expected to reach \$ 884 million by 2032, rising at a market growth of 5.9% CAGR during the forecast period (2026-2032).

Metal biliary stent is an implantable medical device designed to maintain bile duct patency and facilitate effective bile drainage. Typically made from materials such as stainless steel, nitinol, or biodegradable metals, metal stents provide strong radial support and a larger luminal diameter, making them suitable for long-term or permanent biliary drainage. They are commonly used in patients with malignant biliary strictures or situations where frequent stent replacement is not feasible. Some metal stents may be drug-eluting to reduce tumor ingrowth or stent occlusion.

In 2024, global sales of metal biliary stents reached 737,080 units, with an average selling price of US\$734.8 per unit. The single-line production capacity of metal biliary stents is approximately 8,000-10,000 units per year, with a gross profit margin of approximately 50%-75%. The upstream supply chain includes raw material suppliers, functional coatings and drug material providers, and equipment suppliers for stent shaping, laser cutting, and surface treatment. Downstream applications cover hospitals, medical institutions, surgical centers, and distributors or agents. Metal biliary stents are high-value medical devices with slow product turnover but require high precision in materials and manufacturing, serving as a critical long-term solution for patients with malignant biliary strictures.

The key drivers of the metal biliary stent market include the rising incidence of malignant biliary strictures, continuous advancements in metal materials and minimally invasive placement techniques, and increasing hospital demand for high-value, long-lasting medical devices. These factors support sustained demand and market growth.

However, the market also faces risks such as high stent costs limiting patient affordability, potential complications like stent migration or occlusion, intensified competition from plastic and biodegradable stents, and stringent regulatory requirements that may delay product launch. Overall, despite these risks, metal biliary stents remain a critical long-term solution for patients with malignant biliary strictures.

This report studies the global Metal Biliary Stent production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Metal Biliary Stent and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Metal Biliary Stent that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Metal Biliary Stent total production and demand, 2021-2032, (Units)

Global Metal Biliary Stent total production value, 2021-2032, (USD Million)

Global Metal Biliary Stent production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (Units), (based on production site)

Global Metal Biliary Stent consumption by region & country, CAGR, 2021-2032 & (Units)

U.S. VS China: Metal Biliary Stent domestic production, consumption, key domestic manufacturers and share

Global Metal Biliary Stent production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (Units)

Global Metal Biliary Stent production by Type, production, value, CAGR, 2021-2032, (USD Million) & (Units)

Global Metal Biliary Stent production by Application, production, value, CAGR, 2021-2032, (USD Million) & (Units)

This report profiles key players in the global Metal Biliary Stent market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Boston Scientific, Cook Medical, Medtronic, Olympus, W. L. Gore & Associates, M.I.Tech, TaeWoong Medical, Micro-Tech, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Metal Biliary Stent market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (Units) and average price (US\$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Key Questions Answered:

1. How big is the global Metal Biliary Stent market?
2. What is the demand of the global Metal Biliary Stent market?
3. What is the year over year growth of the global Metal Biliary Stent market?
4. What is the production and production value of the global Metal Biliary Stent market?
5. Who are the key producers in the global Metal Biliary Stent market?
6. What are the growth factors driving the market demand?
