Metal bond diamond tool is a type of diamond tool that is used for cutting, grinding, and polishing hard and abrasive materials such as concrete, granite, marble, and other natural stones. Unlike other diamond tools that have a resin or ceramic bond, metal bond diamond tools use a metallic binder to hold the diamond particles in place. Metal bond diamond tools are typically used in applications where the material being worked on is very hard or abrasive and requires a tool that can withstand the high temperatures and pressures generated during cutting or grinding.
