## Abstracts

The global Metal Building Curtain Wall market size is expected to reach \$ 41323 million by 2032, rising at a market growth of 3.5% CAGR during the forecast period (2026-2032).

Metal building curtain wall is a non-structural exterior cladding system applied to metal or steel-framed industrial, commercial, and institutional buildings. It is typically made of aluminum, steel, or composite panels, designed to protect the building from weather, provide insulation, and allow natural lighting while remaining independent of the structural framework. These curtain walls combine durability, aesthetic appeal, and cost efficiency, making them suitable for modern metal construction projects. In 2025, global Metal Building Curtain Wall production reached approximately 79536 k units, with an average global market price of around 404 USD/unit. The production capacity for Metal Building Curtain Wall in 2025 was approximately 80000 k units. The typical gross profit margin for Metal Building Curtain Wall between 10% and 20%.

The metal building curtain wall market is growing steadily due to the rising adoption of steel and metal structures in industrial and commercial construction. Factors such as increased demand for energy-efficient and low-maintenance building envelopes, rapid urbanization in emerging regions, and modernization of existing facilities are driving market growth. Additionally, technological advancements in lightweight panels, coatings, and prefabrication methods are enhancing product performance and installation efficiency.
