Metal cleaning and degreasing is a critical step in the metal finishing process. Even microscopic particles of grease or dirt can impact the quality of the finish. A good industrial metal cleaner for metal finishing and machine parts cleaning is one that can quickly remove all traces of oil and dirt from metal surfaces, leaving them impeccably clean and free of residue. For safety and ease of storage, it should be stable and not highly flammable. It needs to comply with environmental standards, with low ozone depleting potential and low toxicity. Finally, a metal cleaner/degreaser for use in a production facility needs to be affordable and readily available.
