## Abstracts

According to our (Global Info Research) latest study, the global Metal Detector market size was valued at USD 684.3 million in 2023 and is forecast to a readjusted size of USD 1161.1 million by 2030 with a CAGR of 7.8% during review period.

A metal detector is an electronic instrument which detects the presence of metal nearby. Metal detectors are useful for finding metal inclusions hidden within objects, or metal objects buried underground. They often consist of a handheld unit with a sensor probe which can be swept over the ground or other objects. If the sensor comes near a piece of metal this is indicated by a changing tone in earphones, or a needle moving on an indicator. Usually the device gives some indication of distance; the closer the metal is, the higher the tone in the earphone or the higher the needle goes. In this report, metal detector mainly refers to the underground metal detector, and the industrial metal detectors, security screening, pocket probe hand-held detectors are not included.

Global Metal Detector key players include Minelab(Codan), Garrett, Fisher Research Labs, White's Electronics, Bounty Hunter, etc. Global top five manufacturers hold a share about 55%. North America is the largest market, with a share about 55%, followed by Europe, with a share about 25 percent. In terms of product, Very Low Frequency is the largest segment, with a share about 70%.
