Abstracts

The global Metal Duct Expansion Joints market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Metal duct expansion joints are commonly used in various industries, including HVAC systems (heating, ventilation, and air conditioning), power generation plants, industrial process piping, petrochemical plants, paper mills, and other applications where ductwork is subjected to thermal or mechanical movements. They are available in different designs, sizes, and materials to suit specific application requirements and environmental conditions.

Metal duct expansion joints are flexible connectors used in ductwork systems to absorb movement, vibration, and thermal expansion/contraction. They are designed to compensate for the expansion and contraction that occurs in duct systems due to temperature changes or mechanical forces, while maintaining the integrity and alignment of the ductwork.

This report studies the global Metal Duct Expansion Joints production, demand, key manufacturers, and key regions.
