Abstracts

The global Metal Fire Doors market size is expected to reach \$ 7447 million by 2032, rising at a market growth of 5.1% CAGR during the forecast period (2026-2032).

In 2025, global production of metal fire doors reached 49.918 million units, with an average selling price of US\$101 per unit. Metal fire doors are fire doors with a metal body or frame structure that can prevent the spread of flames and smoke for a specified time. They are typically made of galvanized steel, but 304/316 stainless steel can also be used. Internally, they are often filled with fire-resistant materials such as honeycomb cores and mineral wool/mineral wool, and are equipped with fire-resistant hardware, door closers, windows, smoke-proof components, etc., to form a complete door assembly. Applications cover industrial, commercial, and residential fields. The upstream of the industry chain mainly includes galvanized steel sheets, stainless steel sheets, aluminum profiles, mineral wool/mineral wool, honeycomb core materials, fireproof glass, expansion sealing strips, locks, hinges, door closers, escape hardware, and surface powder/paint materials; the midstream includes door manufacturing, door frame and hardware integration, certification testing, and project support; the downstream includes door control installers, industrial plants, commercial real estate, public buildings, medical and educational facilities. Gross profit margin ranges from 20% to 45%.

Regionally, Asia Pacific is the largest market, with China being one of the most important sources of growth. Europe is more mature in terms of metal door penetration and high-standard certification. North America maintains stable demand supported by NFPA and existing building retrofitting. The Middle East continues to grow, driven by high-rise buildings, hotels, and large-scale infrastructure projects. In the future, the industry will continue to develop towards stricter regulations, enhanced multi-

functionality, lightweight and aesthetically pleasing designs, automated linkages, and deeper penetration into highly regulated industries.
