A metal FTTx cabinet is a type of enclosure made of metal, specifically designed for use in FTTx (Fiber To The x) networks. FTTx is a collective term for various fiber - optic communication delivery architectures, such as Fiber To The Home (FTTH), Fiber To The Building (FTTB), Fiber To The Curb (FTTC), etc. The metal FTTx cabinet serves as a crucial component in these networks, providing protection, organization, and management for fiber - optic cables, optical network terminals (ONTs), splitters, and other related equipment. It is engineered to withstand different environmental conditions, including extreme temperatures, humidity, and mechanical impacts, ensuring the stable operation of the FTTx network. These cabinets are often installed in outdoor environments, such as on the sides of buildings, on poles, or in underground vaults, to support the deployment of fiber - optic services to end - users.
