The metal manure board is a kind of equipment used for livestock and poultry breeding, usually used in chicken houses, pig houses and other places. It is usually made of metal materials, such as steel plates, aluminum plates, etc., with certain hardness and toughness, and has excellent properties such as anti-corrosion, corrosion resistance, and wear resistance.

Metal dung drain panels are usually installed at the bottom of livestock and poultry houses to collect the excrement and urine of livestock and poultry and guide them to the septic tank or sewage treatment equipment below. There are some openings or grooves on the drain board, which can allow the manure and urine of livestock and poultry to flow smoothly into the collection equipment below.
