According to our (Global Info Research) latest study, the global Metal Mesh Sensor market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Metal Mesh sensors are produced in a roll-to-roll process. The metal structure is applied to the PET carrier in a single, highly efficient step in a grid-like pattern and sealed with a further PET layer, which is also transparent. This ensures not only the durability, but also the flexibility of the sensors, which are ideally suited for highly sensitive touchscreens, touchpads, but also for use in sliders, buttons and wheels.
