According to our (Global Info Research) latest study, the global Metal-Oxide Semiconductor Insulated Gate Transistor (MOSIGT) market size was valued at US$ 7427 million in 2025 and is forecast to a readjusted size of US$ 9939 million by 2032 with a CAGR of 4.3% during review period.

Metal oxide semiconductor insulated gate transistor (MOSIGT) is a power semiconductor device and majorly finds application in switch, pulse modulation and phase control among others. This device is something of a cross between a conventional Bipolar Junction Transistor, (BJT) and a Field Effect Transistor, (MOSFET) making it ideal as a semiconductor switching device.

The growing demand for electric vehicles and increasing demand for high-voltage operating devices has led to higher adoption of MOSIGT in energy and power, automotive, consumer electronics, and industrial. Hence, the global MOSIGT market is expected to witness moderate growth in the near future owing to high speed switching rate and optimized power loss. However, leakage current at high temperature hinders the market growth. Government initiatives to establish high voltage direct current (HVDC) and smart grids utilizing MOSIGT for power conversion will provide lucrative opportunities for the market.

This report is a detailed and comprehensive analysis for global Metal-Oxide Semiconductor Insulated Gate Transistor (MOSIGT) market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application.
