The global Metal Panel Curtain Wall market size is expected to reach \$ 41323 million by 2032, rising at a market growth of 3.5% CAGR during the forecast period (2026-2032).

Metal panel curtain wall is a non-structural exterior wall system that uses metal panels such as aluminum, steel, or composite materials as the main facade element. It provides weather protection, thermal insulation, and aesthetic appeal while being lightweight and easy to install. Metal panel curtain walls are widely used in commercial, industrial, and institutional buildings, offering durability, design flexibility, and the ability to integrate with energy-efficient and sustainable building solutions. In 2025, global Metal Panel Curtain Wall production reached approximately 79536 k units, with an average global market price of around 404 USD/unit. The production capacity for Metal Panel Curtain Wall in 2025 was approximately 80000 k units. The typical gross profit margin for Metal Panel Curtain Wall between 10% and 20%.

The metal panel curtain wall market is growing steadily due to increased commercial and industrial construction, rising demand for durable and lightweight facade solutions, and the trend toward energy-efficient buildings. The Asia-Pacific region, driven by urbanization and infrastructure expansion, represents the largest growth market. Innovation in materials, such as coated aluminum and composite panels, as well as the integration of aesthetic design with functional performance, continues to shape market development.
