The global Metal Plating and Finishing market size is expected to reach \$ 24050 million by 2032, rising at a market growth of 3.8% CAGR during the forecast period (2026-2032).

Metal finishing refers to the process of placing some type of metal coating on the surface of a metallic part, typically referred to as a substrate. It can also involve the implementation of a process for cleaning, polishing or otherwise improving a surface. Metal finishing often consists of electroplating, which is the process of depositing metal ions onto a substrate via an electric current. In fact, metal finishing and plating are sometimes used interchangeably. However, the metal finishing industry includes a wide range of processes, each offering its own user benefits.

Global metal plating and finishing key players include Pioneer Metal Finishing, Anoplate Corporation, Lincoln Industries, CECO Environmental, Arlington Plating Company, etc. Global top 5 manufacturers hold a share over 5%. Europe and North America are the largest market, both with a share over 67%, followed by Asia-Pacific, with a share about 22 percent.
