The global Metal Scrap Recycling Machine market size is expected to reach \$ 2308 million by 2032, rising at a market growth of 4.5% CAGR during the forecast period (2026-2032).

A Metal Scrap Recycling Machine is specialized equipment designed to process and recover valuable metals from discarded metal products, industrial waste, or end-of-life components. These machines use techniques such as shredding, crushing, magnetic separation, and sorting to separate ferrous and non-ferrous metals, reduce volume, and purify materials for reuse. They help industries achieve efficient metal recovery, minimize environmental impact, and support sustainable resource management.

In 2025, global Metal Scrap Recycling Machine production reached approximately 688 k units, with an average global market price of around 2445 USD/unit. The production capacity for Metal Scrap Recycling Machine in 2025 was approximately 1000 k units. The typical gross profit margin for Metal Scrap Recycling Machine between 20% and 40%.

The Metal Scrap Recycling Machine market refers to the global industry involved in the production, distribution, and adoption of metal scrap recycling equipment. Driven by rising demand for sustainable practices, stricter environmental regulations, and increasing metal prices, the market has been expanding steadily.
