Metal Screen Printing Mesh is a high-precision mesh woven from stainless steel or other metal materials. It is designed for screen printing processes and is used to efficiently transfer complex patterns or graphics to various substrate surfaces. Compared with polyester mesh, metal mesh has higher tensile resistance, wear resistance and high temperature resistance, and can maintain stable performance in high-precision, high-tension and corrosive environments. Its uniform mesh structure is suitable for printing tiny patterns or high-resolution images. It is widely used in electronics, industry and special printing fields, such as printed circuit boards (PCBs), ceramic decoration, glass products and solar cells.
