According to our (Global Info Research) latest study, the global Metal Thermos Flask market size was valued at US$ 347 million in 2025 and is forecast to a readjusted size of US$ 492 million by 2032 with a CAGR of 5.2% during review period.

A metal thermos flask is an essential item for keeping beverages at the desired temperature for extended periods, making it perfect for both hot and cold drinks. Typically constructed from stainless steel, these flasks offer superior durability, resistance to corrosion, and an ability to withstand rough handling. The double-walled, vacuum-insulated design creates a thermal barrier that significantly reduces heat transfer, ensuring that hot drinks stay hot and cold drinks stay cold for hours. Many metal thermos flasks feature leak-proof lids, which prevent spills and maintain the internal temperature by minimizing exposure to the outside environment.
