Abstracts

Metal Tube Rotameter is basically a variable area flow meter. The differential pressure across the annulus area is constant and the flow rate is measured as a function of the position of annulus area created by float position. The position of the float is sensed by a magnet and indicated on the dial in terms of flow rate.

Scope of the Report:

This report focuses on the Metal Tube Rotameter in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

Europe was the largest consumption market with a market share of 25.83% in 2012 and 25.07% in 2017 with a decrease of 0.76%. North America and China ranked the second and third markets with the market share of 20.72% and 20.83% in 2016.
