The global Metal Tube Rotameter market size is expected to reach \$ 833 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

Metal Tube Rotameter is basically a variable area flow meter. The differential pressure across the annulus area is constant and the flow rate is measured as a function of the position of annulus area created by float position. The position of the float is sensed by a magnet and indicated on the dial in terms of flow rate.

ABB, Forbes Marshall and Brooks are the top 3 players of Metal Tube Rotameter, with about 52% market shares. Europe was the largest consumption market with a market share of 25%. North America and China ranked the second and third markets with the market share of 21% and 20%.
