Abstracts

According to our (Global Info Research) latest study, the global Metallocene Polyethylene market size was valued at USD 16060 million in 2023 and is forecast to a readjusted size of USD 19990 million by 2030 with a CAGR of 3.2% during review period.

Metallocene Polyethylene is prepared by means of metallocene catalysts, usually including copolymers. Metallocene polyethylene has a relatively narrow molecular weight distribution, exceptionally high toughness, excellent optical properties and a uniform comonomer content. Because of the narrow molecular weight distribution it behaves less pseudoplastic (especially under larger shear rates). Metallocene polyethylene has a low proportion of low molecular weight (extractable) components and a low welding and sealing temperature.

ExxonMobil, Dow Chemical, Mitsui Chemicals, Chevron Phillips Chemical, INEOS and LyondellBasell are the leaders of the Metallocene Polyethylene industry, which take about 57% market share. North America is the major region of the global market, which takes about 33% market share.
