Abstracts

According to our (Global Info Research) latest study, the global Meter Reading Module market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Wireless meter reading modules are divided into electric meter reading modules and other instrument meter reading modules in terms of power supply. The electric meter reading module has a higher degree of automation and a larger network scale, mainly because the electric meter reading module has a stable power supply and does not require node mode. Other instrument reading modules include water meter reading module, gas meter reading module, and heating meter reading module. These types of modules all require node modules to power batteries. They generally require three years of use, during which the batteries are not allowed to be replaced. Therefore, the network scale will be smaller.
