According to our (Global Info Research) latest study, the global Methanol Distillation Column market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Methanol Distillation Column is an important anti-corrosion distillation equipment in the chemical industry. A general distillation device consists of a distillation tower body, a condenser, a reflux tank, a reboiler and other equipment. The feed enters the tower from a certain tray in the tower, and this tray is called the feed plate. The feed plate divides the tower into upper and lower sections. The part above the feed plate is called the rectification section, and the part below the feed plate is called the stripping section.
