Abstracts

The global Methanol Distillation Column market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Methanol Distillation Column is an important anti-corrosion distillation equipment in the chemical industry. A general distillation device consists of a distillation tower body, a condenser, a reflux tank, a reboiler and other equipment. The feed enters the tower from a certain tray in the tower, and this tray is called the feed plate. The feed plate divides the tower into upper and lower sections. The part above the feed plate is called the rectification section, and the part below the feed plate is called the stripping section.
