Abstracts

The global Methanol market size is expected to reach \$ 50530 million by 2029, rising at a market growth of 0.3% CAGR during the forecast period (2023-2029).

Global core methanol manufacturers include Methanex, Proman etc. The top 5 companies hold a share about 30%. Asia Pacific is the largest market, with a share about 63%, followed by North America and Europe with the share about 15% and 12%.

Methanol (or methyl alcohol) is a colorless liquid essentially produced from natural gas or coal. Methanol is a commodity product, which can either be used directly or further transformed to produce a wide range of chemicals that ultimately find applications in diverse sectors (construction, textiles, packaging, furniture, paints, coatings, etc.). Methanol markets are fairly fragmented; formaldehyde synthesis remains methanol's single-largest outlet. Other major outlets include the production of olefins, methyl tert-butyl ether/methyl tert-amyl ether (MTBE/TAME), blending component for gasoline, and dimethyl ether (DME). The methanol demand pattern is relatively complex and influenced by several distinct market forces, including fuel prices, fuel consumption, environmental policies, biofuel mandates, chemical demand, plastics consumption, and housing markets.

This report studies the global Methanol production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Methanol, and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2022 as the base year. This report explores demand trends and competition, as well as details the characteristics of Methanol that contribute to its increasing demand across
