## Abstracts

According to our (Global Info Research) latest study, the global Methanol-to-Jet (MTJ) Fuel and Alcohol-to-Jet (ATJ) Fuel market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

This report focuses on forecasting the market for two new types of sustainable aviation fuels, Methanol-to-Jet (MTJ) and Alcohol-to-Jet (ATJ).

Methanol-to-Jet (MTJ) fuel is a type of synthetic jet fuel produced from green methanol through a chemical conversion process. It is considered a sustainable aviation fuel (SAF) and is being researched and developed as an alternative to traditional fossil-based jet fuels. Green methanol is produced either from biogenic feedstocks (e.g. biomass gasification) or from carbon dioxide (CO<sub>2</sub>) extracted from the air together with green hydrogen (from water electrolysis with sustainable electrical energy). However, it does not yet have regulatory certification for release as an aviation fuel (by the ASTM organization), which is currently being initiated.

ASTM first certified ATJ-SPK bioblends up to 50%v/v in 2016. The AtJ approach is being expanded through the addition of Alcohol to Jet Synthetic Kerosene with Aromatics (ATJ-SKA) which is similar to ATJ-SPK but contains a higher amount of aromatic compounds, which ensure the swelling of seals in current jet engines. ATJ fuels are considered a promising alternative to conventional crude oil jet fuel because they have the potential to significantly reduce greenhouse gas emissions and reduce Aviation's overall carbon footprint. These fuels are compatible with existing aircraft and infrastructure, making them a viable option to help the aviation industry reduce its

environmental impact.

Although there are relatively clear process routes or technologies for either Alcohol-to-Jet or Methanol-to-Jet, no manufacturer has achieved large-scale production to date, and numerous projects in the market are in the construction or planning stage. This report provides a predictive analysis of this market based on the progress of new projects and the financing of market players, and combines the views of upstream and downstream experts in interviews, etc., with forecast years of 2025-2030, 2035, 2040, 2045, and 2050.

Global key players of Methanol-to-Jet (MTJ) Fuel and Alcohol-to-Jet (ATJ) Fuel include LanzaJet, Gevo, Honeywell, Axens and Topsoe, etc.
