## Abstracts

According to our (Global Info Research) latest study, the global Methylal market size was valued at USD 224 million in 2023 and is forecast to a readjusted size of USD 259.2 million by 2030 with a CAGR of 2.1% during review period.

Methylal is manufactured by oxidizing methanol or through reaction of formaldehyde and methanol. It is a clear, colourless flammable liquid with a low boiling point, low viscosity, and excellent dissolving power. Methylal is soluble in water and miscible with most common organic solvents. It is therefore used primarily as a solvent in the manufacturing of resins, adhesives, paint strippers, and protective coatings.

The major players in global methylal market include Prefere Resins (INEOS), Kuraray, Lambiotte, etc. The top 3 players occupy about 50% shares of the global market. Europe and China are main markets, they occupy about 65% of the global market. Crude grade is the main type, with a share about 57%. Solvents is the main application, which holds a share about 54%.

The Global Info Research report includes an overview of the development of the Methylal industry chain, the market status of Solvents (Superior Grade, Refined Grade), Polymers (Superior Grade, Refined Grade), and key enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Methylal.

Regionally, the report analyzes the Methylal markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives and increasing consumer awareness. Asia-Pacific, particularly China, leads the global Methylal market, with robust domestic demand, supportive policies, and a strong manufacturing base.
