According to our (Global Info Research) latest study, the global Methylene Blue market size was valued at USD 7 million in 2023 and is forecast to a readjusted size of USD 10 million by 2030 with a CAGR of 4.8% during review period.

Methylene blue, also known as methylthioninium chloride, is a medication and dye. Methylene blue was originally synthesized in 1876 as an aniline-based dye for the textile industry, but scientists such as Robert Koch and Paul Ehrlich were quick to realize its potential for use in microscopy stains. The observation of selective staining and inactivation of microbial species led to the testing of aniline-based dyes against tropical diseases. Methylene blue was the first such compound to be administered to humans, and was shown to be effective in the treatment of malaria. Methylene blue was also the first synthetic compound ever used as an antiseptic in clinical therapy, and the first antiseptic dye to be used therapeutically.

Global Methylene Blue key players include BiTe Chemical, Eastman, Macsen Laboratories, Vanshi Chemicals, etc. Europe is the largest consumption market, both with a share about 30%, followed by North America, with a share about 20 percent.
