Methyltin stabilizers are a type of organic tin compounds commonly used as stabilizers for PVC (polyvinyl chloride). They are additives that help to improve the thermal stability and processing properties of PVC, and prevent degradation during the manufacturing and use of PVC products. Methyltin stabilizers typically include methyltin mercaptides and methyltin carboxylates. These stabilizers work by reacting with the chlorine atoms in PVC, forming stable chemical bonds that protect against heat-induced degradation and maintain the integrity of the polymer.
