## Abstracts

According to our (Global Info Research) latest study, the global Micro Balance market size was valued at USD 399.8 million in 2023 and is forecast to a readjusted size of USD 576.2 million by 2030 with a CAGR of 5.4% during review period.

Microbalances are generally designed to measure, weigh and provide data on the tiniest of samples. Most models can effectively provide data for samples weighing between 6 and 0.0001 milligrams. These types of balances are generally used to weigh highly valuable substances in minute quantities. Labotec also stock an extensive range of ultramicro balances, which are designed to weigh and provide data on even smaller samples! These units typically come standard with draft shields so that dust and other foreign particles do not make their way into the dish and corrupt data and materials being worked on.

As for the micro balance industry, the industry structure is relatively concentrated. The top 3 manufacturers occupied 48% of market share. The top 3 manufacturers are Mettler-Toledo, Sartorius AG, and Citizen Scales. The Mettler-Toledo which has 15% market share is the leader in the micro balance industry.

Northern America is the largest consumption region for micro balance about 35%. Europe consumption about 28% is the second consumption region.
