## Abstracts

According to our (Global Info Research) latest study, the global Micro-Encapsulation Fastening market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Micro-Encapsulation Fastening are used to solve vibration loosening problems on Bolts, nuts and other threaded fasteners, as well as leakage problems by applying sealants under the head of Screws and Bolts, replacing “O Rings” and/or gaskets and rubber washer. The pre-applied threadlocker of Micro-Encapsulation Fastening remains inactive until the coated fastener is assembled onto the mating part. During the assembly the micro capsules are ruptured, initiating the polymerization process, curing the assembly quickly at room temperature, providing reliable locking and immediate sealing properties to the assembly.

In the North America market, the major players of micro-encapsulation fastening include ND Industries, Wurth Industrie Service, Bossard Group, Bradley Group and Nylok, etc. The top five players account for about 10% of the market share. In terms of product type, bolts are the largest segment with 81 percent share, and in terms of applications, automobiles have the largest share with about 62 percent.
