Abstracts

According to our (Global Info Research) latest study, the global Micro Glass Fiber Filter Media market size was valued at US\$ 2881 million in 2025 and is forecast to a readjusted size of US\$ 4123 million by 2032 with a CAGR of 5.2% during review period.

Micro Glass Fiber Filter Media is primarily composed of glass microfibers and is manufactured through processes such as wet-laid forming, bonding, reinforcement, composite layering, and slitting. It serves as a high-efficiency filtration material used in HEPA/ULPA high-efficiency air filters, general-purpose air filters, laboratory consumables, liquid filtration cartridges, and medical/specialty filtration components. The estimated overall gross margin is approximately 32%.

Micro glass fiber filter media is a niche ?functional material? segment within high-efficiency filtration. Core demand comes from cleanrooms, semiconductors, pharmaceuticals, hospitals, industrial air purification, and laboratory testing, with HEPA/ULPA air filtration being the largest application.

Growth is driven by three main factors: first, rigid demand for clean air in semiconductor, biopharmaceutical, hospital, and food production facilities; second, stricter industrial emission, indoor air quality, and environmental monitoring standards driving high-efficiency media to replace conventional filters; third, expansion of small-batch, high-value applications such as laboratory testing, medical respiratory filtration, and liquid pre-filtration.

Overall, the segment is expected to experience steady growth rather than explosive expansion. Competitively, high-end HEPA/ULPA and low-resistance, high-strength

media are still dominated by European, U.S., and Japanese companies, while Chinese suppliers continue to penetrate microfiber paper, fiberglass filter paper, and air filtration materials. Industry margins are influenced by energy costs, raw glass fiber prices, and price competition, but high-purity, clean, and custom-specification products can maintain relatively strong profitability.
