## Abstracts

Micro-hospitals are small-scale inpatient facilities on two to three-story buildings built on 20,000 to 50,000-square foot spaces that offer a wide range of medical services in a small, neighborhood setting. They run 24/7, all year long, and commonly have between eight and 10 beds where patients can be observed or admitted for a short stay. Many health systems such as SCL Health and Dignity Health are using micro-hospitals to expand their services and fill gaps in markets where there is not enough demand to support a traditional hospital.
