Microminiature connectors are designed for use in several industrial applications wherein minimum dimensions need to be achieved. These connectors are developed and tested as per MIL specification standards such as MIL-DTL-83513 and MIL-DTL-38999.

Nanominiature or nano-D connectors are offered as both rectangular and circular high-density assemblies. These tiny interconnects use twist pin contact technology to provide a reliable connection even in harsh conditions that encounter shock and vibration, all with low separation force and engagement. Most nano-D connectors are based on MIL-DTL-32139 specification for use in aerospace and military applications. Other common applications requiring this miniature connector design include medical, offshore, industrial control and robotics.
