According to our (Global Info Research) latest study, the global Microbial Activity Assay System market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

The microbial activity assay system evaluates the growth activity of microorganisms by measuring the 'heat' produced by the microorganisms in real time. Even for inhomogeneous samples containing solids or liquids, the growth curve/growth rate of microorganisms can be measured non-destructively without changing the shape.
